TWO DIMENSIONS OF GROWTH

There are two dimensions of growth: the Personal and Transpersonal Dimension.

In the personal dimension of growth individuals strive after goals such as car, house, family, education, romance, finance, career etc.

In spite of all the outward signs of success, some individuals do not find their work meaningful or satisfying at a deeper level. Reporting a vague sense of “something missing”, they believe there must be more to life.

The transpersonal dimension of growth is where the individual finds purpose and meaning in work and life in general. Work is now seen as a vocational calling.

Involving a deeper process of self-discovery through guided imagery, life purpose coaching can help individuals find destiny and mission that lies beyond themselves, and ultimately to work that satisfies the soul.
